Professional Development Interests

The overall purpose of the New Professionals Mentorship Program is to assist clinical social workers who are new to the field with professional development and career planning in clinical social work. The Mentorship Program will attempt to connect you with a qualified mentor who has expertise in your areas of interest. It will be up to you and your mentor to work out the

specific arrangements about focus areas, time frames for this activity and whether the activities will take place on a one-on-one basis or in a group. This is a purely voluntary collegial program.

What are your primary interests (check all areas that apply):

- developing strategies for career development
- understanding practice standards
- identifying and pursuing continued learning needs
- ethical and legal dilemmas
- skill development
- enhancing professional adaptability
- collegial networking
- others (specify) _____
- _____
- _____

Mentorship is clearly differentiated from clinical supervision and psychotherapy, and – in no case – meant as a substitute for either of these processes.

Date: _____
